

U. S. GOVERNMENT TECHNICAL OIL MISSION

INDEXES TO MICROFILMS

T.O.M. Reels 259 to 279

INDEX - MICROFILM-REEL 259

<u>ITEM NO.</u>		<u>FRAMES</u>
1	Studium der Eisen-Katalysatoren bei der Fischer-Tropsch Synthese. By Heinrich Merkel.	1-128
2	Chemical and thermomagnetic studies on iron catalysts for the synthesis of hydrocarbons. By H. Pichler and H. Merkel. Translation by U.S. Bureau of Mines. Material obtained from Dr. Ing. habil. G. Spengler of the Institut für Kohleforschung, Laboratorium für Mineralöle und Teere at the Deutsche Technische Hochschule at Prague:	129-328
3-a	Data for synthesized olefin-hydrocarbons.	329-341
3-b	Pentadecen-1 and 3,6-Dimethylhepten-1.	342-345
3-c	Report on hydrocarbons.	346-354
4	Production costs of CO+H ₂ mixtures for different methods of gasification with oxygen and various fuels. By Otto Hubmann.	355-391
5	Experiments concerning the thickening process of benzol wash oil. By W. H. Oppelt.	392-411
6	Problems of dephenolization of waste liquors. By W. H. Oppelt.	412-447
7	Refining of light oil from coal gas. By W. H. Oppelt.	448-466
8	Synthesis of hydrocarbons from carbon monoxide and hydrogen. By Helmut Pichler.	467-654

T.O.M. Reel 259

<u>ITEM NO.</u>		<u>FRAMES</u>
9	Identification and constitution of the branched chain acids from the Fischer-gatsch fatty acids.	655-664
	Translations from T.O.M. Reel 132:	
10-a	Dust-removal, Report presented by Dr. Geister, Dec. 3, 1936. Translation from T.O.M. Reel 132, Item 1.	665-676
10-b	The removal of carbon black and dust from gases with the Oppauer shaft-filter. Translation from T.O.M. Reel 132, Item 2.	677-702
10-c	Flow sheet of a unit of the Alkazid plant. Translation from T.O.M. Reel 132, Item 3.	703
10-d	Report by Dr. Jeltsch, Sommer and Bungger of visit-made to the Alkazid plant in Lutzkendorf, in regard to corrosion. Translation from T.O.M. Reel 132, Item 4.	704-706
10-e	Experience gained from the operation of Alkazid-desulphurization plants. Translation from T.O.M. Reel 132, Item 5-a.	707-716
10-f	Directions for the operation and supervision of Alkazid plants. Translation from T.O.M. Reel 132, Item 5-b.	717-720
10-g	Flow sheet of an Alkazid scrubbing plant. Translation from T.O.M. Reel 132, Item 5-c.	721
10-h	Detailed flow sheet of the Alkazid process. Translation from T.O.M. Reel 132, Item 6.	722
10-i	Flow sheet of Claus kiln and final combustion unit. Translation from T.O.M. Reel 132, Item 7.	723
10-j	Claus Kiln. Translation from T.O.M. Reel 132, Item 8.	724

T.O.M. Reel 259

<u>ITEM NO.</u>		<u>FRAMES</u>
10-k	Final combustion furnace. Translation from T.O.M. Reel 132, Item 9.	725
10-l	Claus oven operation. Translation data covering operation of Leuna plant. Translation from T.O.M. Reel 132, Item 10.	726-731
10-m	Flow sheet for the removal of hydrogen sulfide. Translation from T.O.M. Reel 132, Item 11.	732
10-n	Iron ore-hydrogen sulfide extraction process. Translation from T.O.M. Reel 132, Item 12.	733
10-o	Several short reports from September 30, 1942 to May 25, 1943 on the subject of dust removal in multi-cyclone units. Translation from T.O.M. Reel 132, Item 14.	734-735
10-p	Reports by Mr. Kenike, dated December 29, 1931, on "The Combustion of H ₂ S to S by Means of a Claus Kiln" and by Dr. Hanisch, dated January 11, 1933 on "Experiments Carried Out with the Aim to Recover Elementary Sulfur from Gases with a Low Content of Hydrogen Sulfide". Translation from T.O.M. Reel 132, Item 15.	736-742
10-q	Computation of combustion temperatures of mixtures consisting of H ₂ S and CO ₂ . Translation from T.O.M. Reel 132, Item 16.	743-745
10-r	Tables of data, dated November 1933, on requirements of Alkazid process for utilities, equipment, solutions, operating personnel etc. Translation from T.O.M. Reel 132, Item 17.	746-752
10-s	Analytical results and methods for gas purification catalysts. Translation from T.O.M. Reel 132, Item 18.	753-759

T.O.M. Reel 259

<u>ITEM NO.</u>		<u>FRAMES</u>
10-t	Memorandum concerning the future development of the Alkazid and Claus-kiln process. Translation from T.O.M. Reel 132, Item 19.	760-761
10-u	Calculations and experiments on the chemical equilibrium of the Claus process. Translation from T.O.M. Reel 132, Item 20.	762-769
10-v	CO removal by means of an ammoniacal copper solution -- 2 flow sheets and legend. Translation from T.O.M. Reel 132, Item 21.	770-772
10-w	Translation of folder containing numerous short reports and drawings on the Alkazid process. Translation from T.O.M. Reel 132, Item 22.	773-816
10-x	Four curves on CO-CO ₂ wash costs. Translation from T.O.M. Reel 132, Item 23.	817-818
10-y	Drawing S IV 3, flow sheet of a pressure water wash process. Translation from T.O.M. Reel 132, Item 24.	819-820
10-z	Report and several drawings concerning the removal of carbon oxysulfide (COS) from gases. Translation from T.O.M. Reel 132, Item 25.	821-828
10-aa	Investigations on the reaction velocity over "brown oxide" catalyst for the shift reaction. Translation from T.O.M. Reel 132, Item 26.	829-844
10-bb	Description of various processes for H ₂ S extraction from gases or for recovery of S from gases containing H ₂ S. Translation from T.O.M. Reel 132, Item 27.	845-846
10-cc	Sulfur-extracting process of the Sacktleben A.G. Szombathy-process, German Patent Application S 117,702. Translation from T.O.M. Reel 132, Item 28.	847-850

T.O.M. Reel 259

ITEM NO.		FRAMES
10-dd	Report on a meeting to exchange information on the operation of Fischer-Tropsch synthesis plants. Preliminary purification of the synthesis gas (H ₂ S removal). Translation from T.O.M. Reel 132, Item 29.	851-857
10-ee	Layout plan for a Claus unit. Translation from T.O.M. Reel 132, Item 30.	858
10-ff	A new process for separation of NH ₃ -CO ₂ -H ₂ S mixture. Translation from T.O.M. Reel 132, Item 31.	859-876
10-gg	German Patent Number 513,288, dated November 25, 1930, to Edward Theisen in Munich entitled "Process for the purification of gases, air, vapors, etc." Translation from T.O.M. Reel 132, Item 32.	877-878
10-hh	German Patent No. 388,857, dated January 21, 1924, to Edward Theisen in Munich entitled "Multistage gas scrubbing". Translation from T.O.M. Reel 132, Item 33.	879-881
11	Memorandum I. Ref.: Transport problems of the dust which is withdrawn from the multicyclone units; waste water disposal installation 46/56.	882
12	Memorandum II. Ref.: Removal of the last traces of the phenols which are present in the waste water.	883
13	Memorandum III. Ref.: Oxygen plant. Memorandum IV. Ref.: Steam supply of the producers.	884
14	Memorandum V. Ref.: Difficulties encountered in the gas production since August 1942.	885-886
15	Dust extraction by means of multiclones.	887-888

<u>ITEM NO.</u>		<u>FRAMES</u>
16	Translations of German documents on mathematical expressions for thermodynamic relationships and the calculation of yields in the Fischer-Tropsch synthesis. Translated by U.S. Bureau of Mines from T.O.M. Reel 134, Navy 5811, Items Ib-1 to Ib-4.	889-982
17	Report on the Synol synthesis. By Dr. Reisinger. Dated May 2, 1941. Translated by U.S. Bureau of Mines from T.O.M. Reel 134, Section II, No. 9.	983-1007
18	The state of the Synol problem. By Dr. Wenzel, dated April 10, 1942. Translation by U.S. Bureau of Mines from T.O.M. Reel 134, Section II, No. 10.	1008-1047
19	Procedure for the catalytic conversion of carbon monoxide and hydrogen to hydrocarbons. Dated December 18, 1942. Translated by U.S. Bureau of Mines from T.O.M. Reel 134, Section IV, No. 1.	1048-1054
20	Report on the progress of the research commission on "Continued development of the gasoline synthesis from CO and H ₂ , especially in the direction of a direct synthesis of isoparaffins (SS 6132-9798/42)". Dated December 1942. Translation by U.S. Bureau of Mines from T.O.M. Reel 134, Section IV, No. 3.	1055-1071
21	Process for the production of antiknock hydrocarbons. Dated October 2, 1943. Translation by U.S. Bureau of Mines from T.O.M. Reel 134, Section IV, No. 4.	1072-1075
22	List of publications received in the library of the Foreign Documents Group of the Office of Synthetic Liquid Fuels, U.S. Bureau of Mines. List No. 5.	1076-1124
