

INDEX - T.O.M. REEL 283  
(Original Designation FIAT Reel CC 61)  
PB E70401

Documents taken from Physikalisch-Technische Reichsanstalt, Berlin

Frames

- 1-11 Physikalisch-Technische Reichsanstalt. By Alfred Schulze. 1943.
- 12-20 Technique of lubrication. By Heidebroek. Dec. 17, 1938.
- 21-44 Technique of lubrication. By Erk. Apr. 11, 1938.
- 45-64 Technique of lubrication. By K. Wolf and H. Harms. Apr. 11, 1938.
- 65-79 Aging of lubricating oils. By Philippovich. Apr. 11, 1938.
- 80-114 Technique of lubrication. By Heidebroek and Rumpf. Apr. 11, 1938.
- 115-129 Wear of machine parts. By Siebel. Apr. 11, 1938.
- 130-178 Synthetic lubricating oils. By H. Zorn. Dec. 17, 1938.
- 179-202 Technique of lubrication. Dec. 17, 1938.
- 203-217 Technique of lubrication. By Kluge. Mar. 4, 1943.
- 218-222 Friction and material wear. By Holm. Mar. 4, 1943.
- 223-227 Bearing shells of hard metal. By Heidebroek. Mar. 4, 1943.
- 228-235 Frictional heat of raw materials. By Siebel. Mar. 4, 1943.
- 236-240 Wire drawing. By Siebel. Mar. 4, 1943.
- 241-246 Oil testing process. By v. Philippovich. Mar. 4, 1943.
- 247-264 Sliding friction of solid bodies. By Wolf, June 29, 1943.
- 265-266 Wear of material by friction. By Kluge. June 29, 1943.
- 267-278 Non-metallic phase in metals. By Kramer. June 29, 1943.
- 279-281 Liquid mixtures. By Dunken. June 29, 1943.
- 282-300 Lubricating behavior of oil during starting friction. By Bartel. Feb. 29, 1944.
- 301-306 Influence of the sliding speed on friction. By Kluge. Feb. 29, 1944.

T.O.M. Reel 283 Cont'd

Frames

- 307-309 Friction wear of piston rings. By Philippovich. Feb. 29, 1944.
- 310-315 Technique of lubrication. By Philippovich. Feb. 29, 1944.
- 316-322 Peroxide content of oils. By Seelich. Feb. 29, 1944.
- 323-326 Lubricating oil. By Herbert Jaisly. 1939. (From "Die Wärme," No. 3, pp. 43-44, 1939.)
- 327-383 Bearing friction. By Theodor Ranow. Dec. 7, 1936.
- 384-386 Rasch, Ewald (Inventor). Bearing with reduced friction. Ger. patent 356,735, Class 47b, group 4, dated Jul. 27, 1922. Supplement to patent 356,734.
- 387-389 Rasch, Ewald (Inventor). Method for reducing the stress of moving parts in machine bearings. Ger. patent 356,734, Class 47b, group 4, dated July 27, 1922.
- 390-395 Additive for high pressure lubrication. By E. Edler. 1944. Reprint from "Oel und Kohle," 1944, 5/6, pp. 102-105.
- 396-413 Pumping behavior of motor oils. By Helder. Jul 20, 1944.
- 414-424 Determination of the octane number. By E. Singer. June 23, 1941.
- 425-438 Lubrication and material wear. By Bochmann. Apr. 22, 1943.
- 439-451 Lubrication as a boundary surface process. By Kluge. Aug. 31, 1944.
- 452-505 Evaluation factors of two-cycle engines. By Jaro Zeman. 1944. From "Deutsche Kraftfahrtforschung," No. 81, 1944, pp. 1-46.
- 506-537 Formation of mixtures in multi-cylinder Otto engines. By Franz Kramor. 1944. From "Deutsche Kraftfahrtforschung," No. 82, 1944, pp. 1-29.
- 538-581 Thermodynamic tests on Diesel engines. By Hand List. 1944. From "Deutsche Kraftfahrtforschung," No. 79, 1944, pp. 1-39.
- 582-608 Measurement of the lubricating properties of lubricants. By Johannes Kluge. 1942. From the "Mitteilungen der deutschen Akademie der Luftfahrtforschung," No. 6, 1942, pp. 299-323.

T.O.M. Reel 283 Cont'd

Frames

- 609-632 Molecular-physical processes in lubrication. By Johannes Wolf. 1942. From the "Mitteilungen der deutschen Akademie der Luftfahrtforschung," No. 6, 1942, pp. 325-348. (Translation appears on TOM Reel 250, Item No. 7).
- 633-638 Mixture formation and combustion in the Diesel engine. By W. Pauer. Oct. 1, 1940. From "Deutsche Kraftfahrtforschung."
- 639-646 Diesel engine with two types of fuel. By Potthoff. n.d. From "Deutsche Kraftfahrtforschung."
- 647-662 Diesel engine with two types of fuel. By Rixmann. n.d. From "Deutsche Kraftfahrtforschung."
- 663-676 Efficiency and course of combustion in the Diesel engine. By List. n.d. From "Deutsche Kraftfahrtforschung."
- 677-679 Supercharging of Diesel engines in vehicles. By Ernst. n.d. From "Deutsche Kraftfahrtforschung."
- 680-696 Formation and combustion of fuel-air mixtures. By Blume. n.d. From "Deutsche Kraftfahrtforschung."
- 697-729 Influence of the mixture formation and combustion on losses in combustion engines. By Ullmann. n.d. From "Deutsche Kraftfahrtforschung."
- 730-746 Character of the injected fuel at injection into Diesel engines. By Oschatz. n.d. From "Deutsche Kraftfahrtforschung."
- 747-752 Measurement of the ignition delay in Diesel engines. By Ernst. n.d. From "Deutsche Kraftfahrtforschung."
- 753-756 Diesel engine with laterally controlled valves. By Ernst. n.d. From "Deutsche Kraftfahrtforschung."
- 757-794 Test engine for light fuels. n.d.
- 795-823 Diesel test engine for Diesel fuels. 1940.
- 824-840 Control of D.C. motors. By C. Moerder. July 3, 1943. Special reprint from the Archives for Electrical Engineering, pp. 571-587, July 3, 1943.
- 841-896 Traces of electric arcs supplied to metals for a short period of time. By Hans Roth. Nov. 10, 1939.
- 897-944 Determination of the size of smallest particles by X-rays. By Gunter Freyer. June 15, 1939.
