

TECHNICAL & RESEARCH DIVISION
ENGINEERING DEVELOPMENT GROUP (N.Y. OFF.)
REPORT NO. 1

Report Approved: March 17, 1947

Work Completed: 2-15-47

HYDROGENATION OF CARBON MONOXIDE
CORRELATION OF SYNTHESIS DATA

INDEX

	<u>Page No.</u>
I. INTRODUCTION	1
Scope	1
II. PROCESS FLOW	2
III. PROCESS VARIABLES	3
IV. PRODUCT COMPONENTS	4
V. DATA	5-6
Data Summaries	7-23
Accuracy of Data	24
Range of Variables	24-25
VI. APPARATUS USED	26
VII. CORRELATIONS	27
A. Conversions & Distribution of Product	27
Measure of Degree of Conversion	27
% Contraction vs. H ₂ Conversion	28-30
H ₂ Conversion vs. CO Conversion	30-33
H ₂ Conversion vs. CO to CO ₂	33-35
H ₂ Conversion vs. CO to C ₃ ⁺	35-37
H ₂ Conversion vs. CO to C ₁ + C ₂ S	37
H ₂ Conversion vs. CO to CH ₄	38-39
CH ₄ Yield vs. Yield of C ₂ S	39-40
H ₂ Conversion vs. Yield of C ₂ S	40
CH ₄ Yield vs. Unsats. in C ₂ S	40-41
Unsats. in C ₂ S vs. Unsats. in C ₃ S and C ₄ S	41
H ₂ Conversion vs. H ₂ O Yield	41-42
H ₂ Conversion vs. Yield of Oxy. Comps.	42
B. Effect of Operating Variables	43
Effect of Recycle Ratio	43-44
Recycle Ratio vs. Total Feed Composition	44
Effect of Temperature	44-45
Effect of Pressure	45
Effect of Space Velocity	45
VIII. DISCUSSION	46
Fixed Bed Theory	46-47
Fluid Bed Working Hypothesis	48-49
Oxygenated Compounds	49-50
"Catalyst Equilibrium"	50-51
Water-Gas-Shift Equilibrium	51
Gas Production	51-52
Other Reactions	52
Application of Hypothesis	53

Effect of Catalyst Activity	53-54
Effect of Temperature	54
Effect of Space Velocity	54-55
Effect of Adding CO ₂	55-56
Effect of Recycling	56-57
Effect of H ₂ /CO Ratio in Feed	57
Once Through Operations	58
Water-Gas-Shift Equilibrium	59-60
H ₂ /CO Consumption	60-61
Oxygenated Compounds	61-63
Conclusion	63
